## Provider Profile

---

Information provided by the provider describing their agency:

I am a nationally certified school psychologist as well as BCBA-D. While I have worked over 25 years in public school settings, I currently provide direct service as well as consultation for children with autism in their homes and schools. I have extensive experience with the Birth to 5 population of children requiring special services as I have been a part of the early intervention programming in California. While my public school experience related to children from all age levels, pre-school to high school settings, I participated in program planning with many of the disabilities found in these settings. I have provided psychological assessments and counseling along with functional behavior assessments to individuals recommended for these services. As a BCBA-D not only did I develop the behavior plan but I also supervised its implementation. This process may involve coaching and modeling for the teaching staff as well as home visits to ensure implementation and generalization to that environment.

I have a Ph.D. in Special Education from the University of Connecticut, MA degrees from Loma Linda University in California (Counselor Education) and Fairfield University (Educational Administration) in Connecticut, and a BA degree (Psychology) from Cal-State San Bernardino in California. My training in behavior analysis was at the University of Kansas.

Throughout my career, I have conducted workshops and presentations of my research to various groups locally and nationally. Most recently this research has consisted of teaching play skills as an alternative to stereotypical behavior in a child with moderate/severe autism. This was presented in Massachusetts, Washington DC, and Denver, Colorado.
